## SUMMER QUIZ PRACTICE YOUR ENGLISH THE FUN WAY

### Weather

1 - You experienced a sudden change of wind velocity and/or vector. The change may have been vertical or horizontal or a mixture of both. You encountered:

- a - a downburst
- b - a wind shear
- c - a microburst
- d - a gale

2 - The phenomena which most reduces visibility is:

- a - thunderstorms
- b - light rain showers
- c - heavy drizzle
- d - moderate rain

3 - In a METAR message, which of the following types of clouds are included in the sky coverage:

- a - cumulonimbus (CB) and towering cumulus (TCU)
- b - cumulus (CU)
- c - stratus (ST)
- d - cirrus (CI)

4 - In a METAR message, for the wind direction to be indicated by the VRB code the wind speed must be less than:

- a - 2 kt
- b - 3 kt
- c - 4 kt
- d - 5 kt

5 - In a METAR message, the symbol HZ (haze) is used when the horizontal visibility is:

- a - less than 1000 meters
- b - less than 3000 meters
- c - less than 5000 meters
- d - between 1000 and 5000 meters

### Flight plans

6 - A pilot transmits limited information (callsign, type of aircraft, point of entry, point of exit, level) to ATC by radio-telephony to cross a portion of controlled airspace, he has

- a - filed a full flight plan
- b - filed a repetitive flight plan
- c - filed an abbreviated flight plan
- d - not filed a flight plan

7 - In the case of a non-controlled flight, delays should be submitted if they are more than:

- a - 30 minutes from the scheduled time of departure from the stand
- b - 30 minutes from the scheduled take-off time
- c - 60 minutes from the scheduled time of departure from the stand
- d - 60 minutes from the scheduled take-off time

8 - In box 8, the letter Z is used to indicate that the flight conforms to the rules of the air

- a - IFR
- b - VFR then IFR
- c - IFR then VFR
- d - VFR

9 - In box 19 of a flight plan, for endurance, the pilot must indicate the time corresponding to:

- a - the required fuel for the flight
- b - the usable fuel in flight
- c - the required fuel for the flight plus the alternate and 45 minutes reserve
- d - the maximum endurance of his aircraft

10 - At night, a VFR flight plan - full or abbreviated - must be filed:

- a - in all circumstances
- b - if you cannot maintain two-way communication with ATC

- c - if you leave the vicinity of the aerodrome
- d - if the cloud ceiling is below 1500 feet

### Communication

11 - ATC would instruct you to turn off the Mode C altitude encoding feature of your transponder by saying:

- a - stop mode C, wrong indication
- b - stop altitude encoding
- c - squawk standby
- d - squawk ident

12 - Which of this information must be relayed by the Air Traffic Services?

- a - Sigmets
- b - volcanic activity
- c - radioactivity hazard
- d - all of the above

13 - In the UK, transmissions at unattended aerodromes must be addressed to:

- a - (Aerodrome name) Traffic
- b - (Aerodrome name) Information
- c - (Aerodrome name) Tower
- d - (Aerodrome name) Transmitting blind

14 - Following traffic information, how will ATC signal that there is no more danger of collision?

- a - traffic no longer a factor
- b - clear of traffic
- c - disregard traffic information
- d - traffic now irrelevant

15 - Which of these elements, among others, must a pilot read back?

- a - taxi instructions
- b - runway-in-use
- c - frequency changes
- d - all of the above

Answers  
1 - b; 2 - c; 3 - a; 4 - a; 5 - a; 6 - b; 7 - c; 8 - b; 9 - c; 10 - c; 11 - a; 12 - d; 13 - b; 14 - d; 15 - d
